

## OneAccess Appoints Chris Burke to Board of Directors

**Paris, France, December 3, 2007** - OneAccess, European leader of enterprise access routers and professional multiplay devices, today announced that Chris Burke has been appointed to its Board of Directors.

Kevin Power, Chairman of OneAccess Networks, said: "Chris Burke brings considerable experience and technology leadership in both the fixed and wireless markets to his new role as OneAccess Board Director. He will play a key role in our future growth as well as helping us to evaluate and further develop our strategic goals and objectives. We look forward to his active contribution as the Company continues on its strong growth path."

Chris Burke has more than 24 years in the telecommunications industry. Until September 2004, Burke was the Chief Technology Officer for Vodafone UK Ltd. In that capacity he was responsible as CTO and CIO for all Vodafone UK Technology and Product architecture, design, procurement, development, deployment, support and operations. As CTO of one of Vodafone's leading operating companies, he also had responsibility for Northern European Technology initiatives as well as sitting on the Global Information Technology and Technology Management Boards for Vodafone Group.

Previous to Vodafone, Burke was CTO and CIO of the UK fixed line carrier, Energis. and was an important part of the executive team which led Energis through its IPO and into the FTSE 40. He was responsible for technology and product architecture, design, development, deployment, and support. Prior to this Burke spent 15 years in Research, Development, Operations and ultimately Sales in Nortel.

Presently Burke serves on a number of Boards and most recently was Chairman of Ubiquity Software UBQ.L (SIP Application Servers and Service Creation Environment) before it was sold to Avaya earlier this year.

### **ABOUT ONEACCESS**

Created in 2001, OneAccess develops and manufactures multiservice access routers and network access equipment. OneAccess built its success by focusing on answering telecommunication operators' requirements. The OneAccess product range is designed to deliver top-quality data and voice services, ensuring high security levels, reliability and facilitating integration. The result is improved productivity and reduced Total Cost of Ownership. Since its creation, OneAccess has grown to become a worldwide provider of network access equipment, working with a large number of incumbent (ILEC), alternative (CLEC) operators and various other Service providers.

To find out more on how OneAccess' product range is capable of matching operators' current and future needs, visit <http://www.oneaccess-net.com/>
