

## OneAccess Achieves Metro Ethernet Forum MEF 9 and 14 Certification

Press Release

### *Validates Service Performance and Compliance of Carrier Ethernet Equipment*

**June 9<sup>th</sup> 2010, London and Paris:** OneAccess, a leading European provider of multi-service access routers and Ethernet access devices (EADs), today announced it has achieved MEF (Metro Ethernet Forum) 9 and 14 Certification.

The Certifications define a global standard to measure and enforce premium carrier Ethernet services, and verifies that OneAccess' products are MEF-compliant and adhere to service performance and traffic management specifications in the delivery of competitive, triple-play services (voice, video and data).

Mike Wilkinson, CMO at OneAccess Networks, comments; "Achieving MEF 9 and 14 demonstrates OneAccess' commitment to carrier Ethernet best practice, compliance, and interoperability. The standards, which are created as a benchmark for quality of service, provide independent validation of our product set."

MEF 9 serves as a test suite for conformance of Ethernet services and equipment when deployed at the UNI, and MEF 14 provides managed QoS backed by service level specifications for carrier Ethernet services.

###

#### **About OneAccess**

Incorporated in 2001, OneAccess is a leading manufacturer of multi-service routers and carrier Ethernet access devices enabling major telecoms service providers to deliver business-grade managed services profitably. OneAccess supplies routers to over 100 service providers including 4 of the top 5 largest telecoms operators in Europe.

By using mass customisation techniques OneAccess router solutions can be precisely tailored to meet the stringent demands of the business managed services market enabling superior performance, management, reliability and services innovation.
